Why is Myanmar launching a solar power initiative?

Myanmar's military government has launched a solar power initiative to address the nation's energy crisis, hoping to attract foreign investment and boost electricity generation.

This effort faces challenges due to the ongoing economic downturn and political instability following the 2021 coup.

Should Myanmar switch to solar energy?

For the past three years, Myanmar has been plunged frequently into darkness as the ruling junta's corruption wreaks havoc on the country's infrastructure.

In this crisis, shifting to solar energy is less about environmental consciousness and more about a desperate need for survival.

Is solar energy a viable solution to Myanmar's energy crisis?

Myanmar's energy crisis has been exacerbated by the military's mismanagement of the sector.

Despite increasing the number of power plants, the junta struggles to meet the country's energy demands.

Many of these plants rely on imported LNG, which is costly and unsustainable.

Solar energy is seen as a more viable and long-term solution.
